1. [VEPF-13] Verification of CommonOrderNo

Because CommonOrderNo could be registered on several voyages (e.g. if you create a voyage by copying another one) the volumes under Follow up data could be showing volumes that belonged to several voyages. To avoid this rules has been implemented that will prevent that volumes to be updated on old voyages (created for more than 12 months ago) and that measurements older than 12 months will not be included when volumes sums up.

2. [VEPF-49] GDPR – Automatically remove inactive users

To have a more updated user-register inactive users will now be deleted after 18 months of inactivity. Two weeks before deletion the user will get an e-mail with a request to login (*Picture 1*). If that is not done the user will be deleted (two weeks after the e-mail has been sent).

From: Vesselplan Support (Demo) <support@vesselplan.com>

Subject: Account expiration

This is a reminder from Vesselplan

Hello Test Persson,

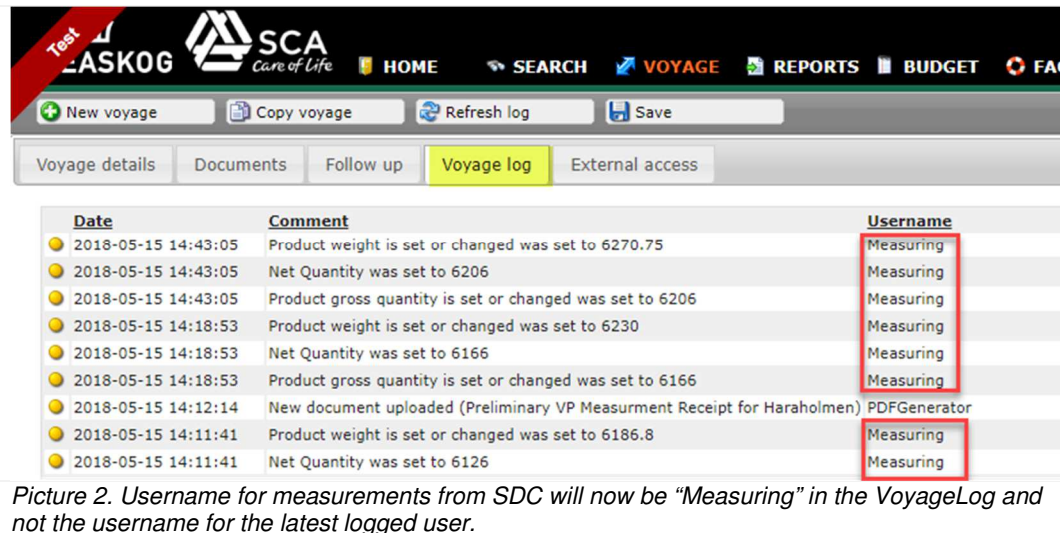

You are receiving this email because you have not logged in to Vesselplan since 2016-11-29 14:47:18. If you do not login before 2018-05-29 14:49:24, your account will be deleted.

Picture 1. The e-mail with a request to login within two weeks or to be deleted.

3. [VEPF-52] BUG: Latest active becomes responsible for updates in VoyageLog

When the system (Vesselplan) itself made changes that affected the VoyageLog the last user that was logged became registered for the edit even

though that user had nothing to do with the edit. Since the most common edit the system make is edits of measured volume from SDC we have now changed edits of measured volume to be registered as “Measuring” (Picture 2).

Picture 2. Username for measurements from SDC will now be “Measuring” in the VoyageLog and not the username for the latest logged user.

4. [VEPF-53] Doesn’t work to use ”Forgot your password?”

The function for “Forgot your password” when trying to login is now functional again. When using it don’t forget to mark the “I’m not a robot”-checkbox before typing your e-mail address and pressing [Continue] (Picture 3).

Picture 3. Don’t forget to mark the “I’m not a robot”-checkbox before presseing [Continue].

5. [VEPF-54] SUPERUSERS only for Sveaskog, SCA and Hede

This is not actually a release matter but in connection with the release the SUPERUSER-role will only be designated to a selection of users from Sveaskog, SCA and Hede.

6. [VEPF-55] SUPERUSER should be able to create COMPANIES

Users with the SUPERUSER-role should now be able to create a variety of COMPANIES.

7. [VEPF-62] GDPR – Deleting logfiles automatically

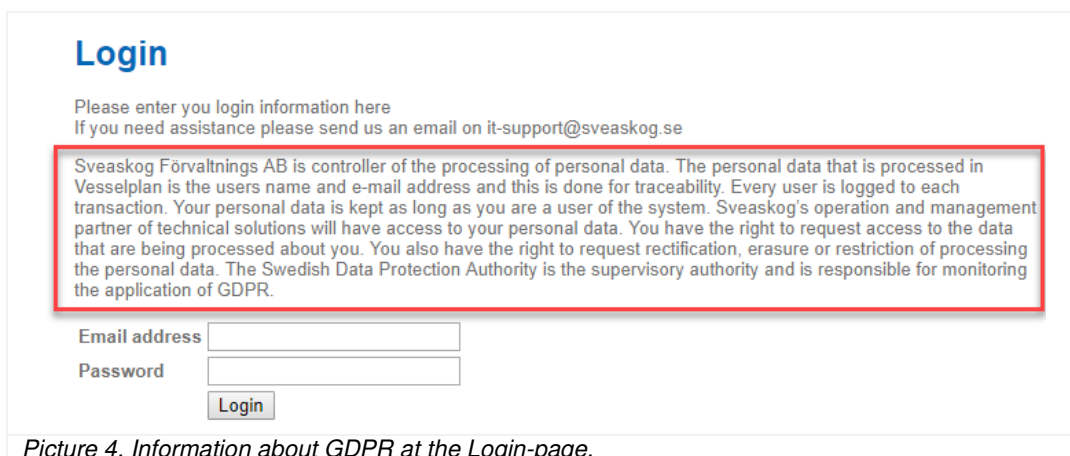

Logfiles will now be automatically deleted after 6 months.

8. [VEPF-67] BUG – VIOL2 – Filter superfluous/defective Measuring-Ticket-messages

Vesselplan was receiving two types of PapiNet MeasuringTickets where one is superfluous. The superfluous one is now filtered via BizTalk and is never send to Vesselplan.

9. [VEPF-77] GDPR – Information about GDPR on the Login- and FAQ-page

In connection with GDPR users have to be informed about their right according to GDPR. Information about GDPR now occur in two places in Vesselplan; at the Login-page (*Picture 4*) and at the FAQ-page (*Picture 5*). It's the same text in both locations.

The screenshot shows the 'Login' page of Vesselplan. At the top, there is a blue heading 'Login'. Below it, a message reads: 'Please enter you login information here' and 'If you need assistance please send us an email on it-support@sveaskog.se'. A prominent red-bordered box contains the following text: 'Sveaskog Förvaltnings AB is controller of the processing of personal data. The personal data that is processed in Vesselplan is the users name and e-mail address and this is done for traceability. Every user is logged to each transaction. Your personal data is kept as long as you are a user of the system. Sveaskog's operation and management partner of technical solutions will have access to your personal data. You have the right to request access to the data that are being processed about you. You also have the right to request rectification, erasure or restriction of processing the personal data. The Swedish Data Protection Authority is the supervisory authority and is responsible for monitoring the application of GDPR.' Below this box are two input fields: 'Email address' and 'Password', followed by a 'Login' button.
