10.	[VEPF-91] BUG: Error when sending mail with line brakes in the mail subject

#### 1. [VEPF-57] SUPERUSER should be able to delete other users

A user with the SUPERUSER role has now the privilege to delete other users belonging to the same company as the SUPERUSER.

#### 2. [VEPF-58] The default status when creating a voyage from a budget row is now PLANNED instead of BUDGET

When creating voyages from the BUDGET->Budget-view the default status will be "Planned" instead of "Budget" (Picture 1).

# 3. [VEPF-64] and [VEPF-84]: Remove some of the SDC-status and the confirmation of measurement completed on the Follow up-page and also display a list with alarms on the HOME-page

The VEPF-64 and VEPF-84 implies that in the Follow up-page the manual confirmation of measurement completed has been removed a long with the SDC-status "Pending confirmation" and "Corrected measuring" (*Picture 2*).

If your company handles measurements receipts you will be able to find link to an alarm list on the HOME-page (*Picture 3*). The list contains voyages with:

- 1) No SK1 within 5 days from the first incoming measurement.
- 2) Status completed and SDC-status corrected measuring.

Picture 3. Above: The link to the new alarmlist on the HOME-page. Bottom: How the list looks like.

### 4. [VEPF-68] Update volumes on the Follow up-page even though the voyage status is "completed"

Once a voyage got the status *completed* measured volumes stopped being updated on the Follow up-page. This is now changed so that a voyage keeps getting its' volumes updated regardless of the voyage status being *completed*.

#### 5. [VEPF-73] and [VEPF-85]: New logos and background colour

Both company logos have been updated with new ones and the background color of the "header" is changed (*Picture 4*).

### 6. [VEPF-74] SUPERUSER – Privileges to connect other users to roles within the company

Before only ADMINs could connect other users to different roles *e.g.* buyer, ShipAgent. Now this ability is also granted to the SUPERUSER for users belonging to the same company as the SUPERUSER.

Roles are added to users under the ADMIN->Users->Connections-page (*Picture 5*).

## 7. [VEPF-79] BUG: Checkboxes on the External access-page does not remain checked

Fixed a bug that unchecked checkboxes on the External access-page after checking, saving and returning to the External access-page.

### 8. [VEPF-89] BUG: Defective volume measurements on collective adjustments

Fixed a bug that affected the volume measurements on collective adjustments.

#### 9. [VEPF-90] Expand the logging of received measurements from SDC

To simplify trouble shooting with volume mismatch between SDC (VIOL) and Vesselplan all PapiNet-messages are saved, not only those used for the measurement tables in the database.

### 10. [VEPF-91] BUG: Error when sending mail with line brakes in the mail subject

Fixed a bug that made the mail sending service crash from time to time.
